NIQA NABILA NUR IHSANI

Bandung, Indonesia | +62 852-2175-2429 | niqanabila06@gmail.com | LinkedIn | Portfolio

SUMMARY

Computer Engineering & Informatics graduate with hands-on experience in requirements analysis, system design, and process improvement across financial and government technology projects. Currently defining requirements and evaluating system architecture for an automated payment-matching platform at Mandiri International Remittance, and previously defined 12 features, business rules, and acceptance criteria for a seismic monitoring system at BMKG. Skilled in stakeholder communication, process and data-flow analysis, SQL, Excel, Jira, and technical documentation, with the technical background to translate business needs into implementable system requirements.

TECHNICAL SKILLS

Requirements & Analysis: Requirements Gathering, Functional & Non-Functional Requirements, User Stories, Business Rules, Acceptance Criteria, Process Analysis, Data Requirements, RTM
System & Process Modeling: Process Flow, Data Flow, System Architecture Evaluation, UML/Diagramming, Technical Documentation
Data & Analytics: SQL, Microsoft Excel, Tableau, Power BI, Python (Pandas, NumPy), ETL (Talend)
Technical: REST APIs, Postman, MySQL, PostgreSQL, MongoDB, Git/GitHub, Docker
Project & Collaboration: Agile/Scrum, Kanban, Jira, Taiga, Stakeholder Collaboration, Figma, Notion, Draw.io, dbdiagram.io
Languages: Indonesian (Native); English (TOEIC 870)

WORK EXPERIENCE

Mandiri International Remittance | Remote
Software Engineer *Aug 2026 – Present*

- **Requirements:** Defined business rules, user stories, and technical requirements with Finance, Operations, and IT; evaluated implementation architecture and tracked development in Jira.
- **Pipeline:** Developing a Django-based payment reconciliation pipeline that matches bank transfers with customer payments using rule-based and fuzzy matching logic, reducing manual reconciliation effort.

Meteorology, Climatology, and Geophysical Agency (BMKG) | Indonesia
Guest Technical Trainer *Nov 2025*

- Delivered training for 20+ senior staff on web development and Agile (Scrum/Kanban) through live coding and demonstrations.

Software Engineer Intern *Jun – Oct 2025*

- **Requirements & Stakeholder Collaboration:** Defined 12 core features for the Seismic Station Monitoring System through user stories, business rules, and acceptance criteria; maintained requirement updates throughout development.
- **System & Data Analysis:** Designed system and data flows using Draw.io and dbdiagram.io; translated requirements into technical specifications and supported implementation of the React/Node.js system with 13 REST API endpoints and external SQES API integration.
- **Legacy System Analysis:** Analyzed existing INATEX CodeIgniter 3 modules and redesigned database schemas to support four user roles.
- **Team Collaboration:** Led a Git/GitHub workshop on branching and conflict resolution and supported Agile/Scrum practices within the development team.

Headstarter AI | Remote, New York | Software Engineering International Fellow *Jul – Sep 2024*

- Completed a 7-week fellowship building 5+ full-stack projects, including AI-powered apps, with Next.js, OpenAI, and Firebase.

PROJECT EXPERIENCE

E-Commerce Market Intelligence System - Shopee | Data Engineer *Aug – Dec 2024*

- **Agile & Validation:** Collaborated with 6 development teams in Agile/Scrum, contributing to acceptance criteria and sprint reviews.
- **Data & Process Analysis:** Developed Talend ETL pipelines to clean and load scraped data into MongoDB; defined the logic for engagement-rate calculations.

SIPTA – Thesis Management Platform | Software Quality Assurance *Feb – Jun 2026*

- Worked with 6 development teams in Agile/Scrum environments, contributing to acceptance criteria, updating functional requirements, and participating in sprint reviews while keeping project documentation up to date.
- **Test Design:** Designed and categorized test cases using functional, boundary, and negative testing across sub-features including CRUD, interface, search/filtering, and accessibility.

EDUCATION

Bandung State Polytechnic (Polban) | Applied Bachelor (D4) of Computer Engineering and Informatics *Aug 2022 – Aug 2026*
Relevant Coursework: Software Analysis & Design I–II, Feasibility Study & Software Systems Engineering, Technical & Business Communication, Industry Software Engineering Best Practices

ORGANIZATIONAL & LEADERSHIP

Regional Youth Leadership Summit (RYLS) International 2025 | Scholarship Awardee & Delegate | Tokyo, Japan *Nov 2025*

- Competitive scholarship to represent Indonesia, selected for leadership potential and an essay on the SDGs.

Assalam Polytechnic Bandung | Deputy Head of Social Management *Mar 2023 – Jan 2025*

- Secured 20+ media partnerships; managed financial planning for 7+ programs, including National PIF.

CERTIFICATIONS & AWARDS

Junior Software Quality Assurance – ArutalaLab (2026) | Innovating with AI – Yayasan Plan International Indonesia (2025)
2nd Runner-up, National SDGs Essay – Global Youth Action (2026) | Best Research Award – Literary Talent & Research Initiative (2025)
