Test Result SwabLabs_Niqa .XLSX

Test_ID	Test Feature	Test Case Name	Pre-Conditions	Test Data	Test Steps	Expected Result	Test Type
TC01	Login	Verify layout screen Login page	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	-	Check every area in Login page same with design	1. System display Login page 2. show Page Tittle "Swag Labs" 3. display form login (username, password and login button)	
TC02	Login	User login to Swag Labs web with correct username and password	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	Username: problem_user Password: secret_sauce	1. User fill username and password with test data beside 2. User click Login button	System display dashboard Swag Labs page and show Page Tittle "Products"	Positif
TC03	Login	User login to Swag Labs web with correct username but password not filled	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	Username: problem_user Password: {empty}	1. User fill username and password with test data beside 2. User click Login button	1. System will show throw error message "Password is required" 2. Current page still in Login page	Negatif
TC04	Login	User login to Swag Labs web with password filled but username not filled	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	Username: {empty} Password: secret_sauce	1. User fill username and password with test data beside 2. User click Login button	1. System will show throw error message "Username is required" under username field 2. Current page still in Login page	Negatif
TC05	Login	User login to Swag Labs web with username and password not filled	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	Username: {empty} Password: {empty}	1. User fill username and password with test data beside 2. User click Login button	1. System will show throw error message "Username is required" and "Password is required" 2. Current page still in Login page	Negatif
TC06	Login	User login to Swag Labs web with correct username but password does not match	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	Username: problem_user Password: secret	1. User fill username and password with test data beside 2. User click Login button	1. System will show throw error message "Username and password do not match any user in this service" 2. Current page still in Login page	Negatif
TC07	Login	User login to Swag Labs web with username doesn't registered	1. User already open browser 2. User has navigate to SwagLab Apps (https://www.saucedemo.com)	Username: standard Password: secret_sauce	1. User fill username and password with test data beside 2. User click Login button	1. System will show throw error message "Username and password do not match any user in this service" 2. Current page still in Login page	Negatif
TC08	Dashboard	Verify layout screen Dasboard page	1. User has login to SwagLab Apps 2. User has navigate to Dasboard	Produc is 6 item 1. Name = Sauce Labs Backpack price = 29.99 2. Name = Sauce Labs Bike Light price = 9.99 3. Name = Sauce Labs Bolt T-Shirt price = 15.99 4. Name = Sauce Labs Fleece Jacket price = 49.99 5. Name = Sauce Labs Onesie price = 7.99 6. Name = Test.allTheThings() T-Shirt (Red) price = 15.99	Check every area in Dasboard page same with design	1. System display dashboard Swag Labs page 2. show Page Tittle "Products" 3. show item product list in conten area 4. show filtering field product in navbar area 5. show Cart icon in header page 6. Default value on the filter uses "Name (A to Z)"	Positif
TC09	Dashboard	Verify displayed product is working properly	1. User has login to SwagLab Apps 2. User has navigate to Dasboard	Produc is 6 item 1. Name = Sauce Labs Backpack price = 29.99 2. Name = Sauce Labs Bike Light price = 9.99 3. Name = Sauce Labs Bolt T-Shirt price = 15.99	1. User fill username and password with test data beside 2. User click Login button	1. Displayed information product consist picture, name of product, description, and price based on data from databased 2. In every product have "Add to cart" button can be clicked	Positif

Test Case (3)

H	I	J	K	L	M
Test Type	**Test Result**	**Test PIC**	**Test Date**	**Incident ID**	**Catatan/Alasan**
	Requirement does not clear	Niqa	27 June 2026		Berdasarkan instruksi "Test Step" diminta untuk melakukan perbandingan dengan desain. Namun, instruksi yang diberikan kurang jelas dengan tidak disediakannya link menuju halaman desain ataupun gambar dari desain aplikasi/layout screen login sehingga tidak dapat dilakukan pengecekan atau perbandingan.
Positif	Passed	Niqa	27 June 2026		
Negatif	Failed	Niqa	27 June 2026	IR01	
Negatif	Failed	Niqa	27 June 2026	IR02	
Negatif	Failed	Niqa	27 June 2026	IR03	
Negatif	Failed	Niqa	27 June 2026	IR04	
Negatif	Passed	Niqa	27 June 2026		
Positif	Passed	Niqa	27 June 2026		
Positif	Requirement does not clear	Niqa	27 June 2026		Berdasarkan "Expected Result" dikatakan "price based on data from databased" atau melakukan perbandingan dengan data dalam database. Namun, instruksi yang diberikan kurang jelas dengan tidak disediakannya akses database, dataset atau sekedar diberikannya data yang benar sesuai dengan database sehingga tidak dapat dilakukan pengecekan ataupun perbandingan.

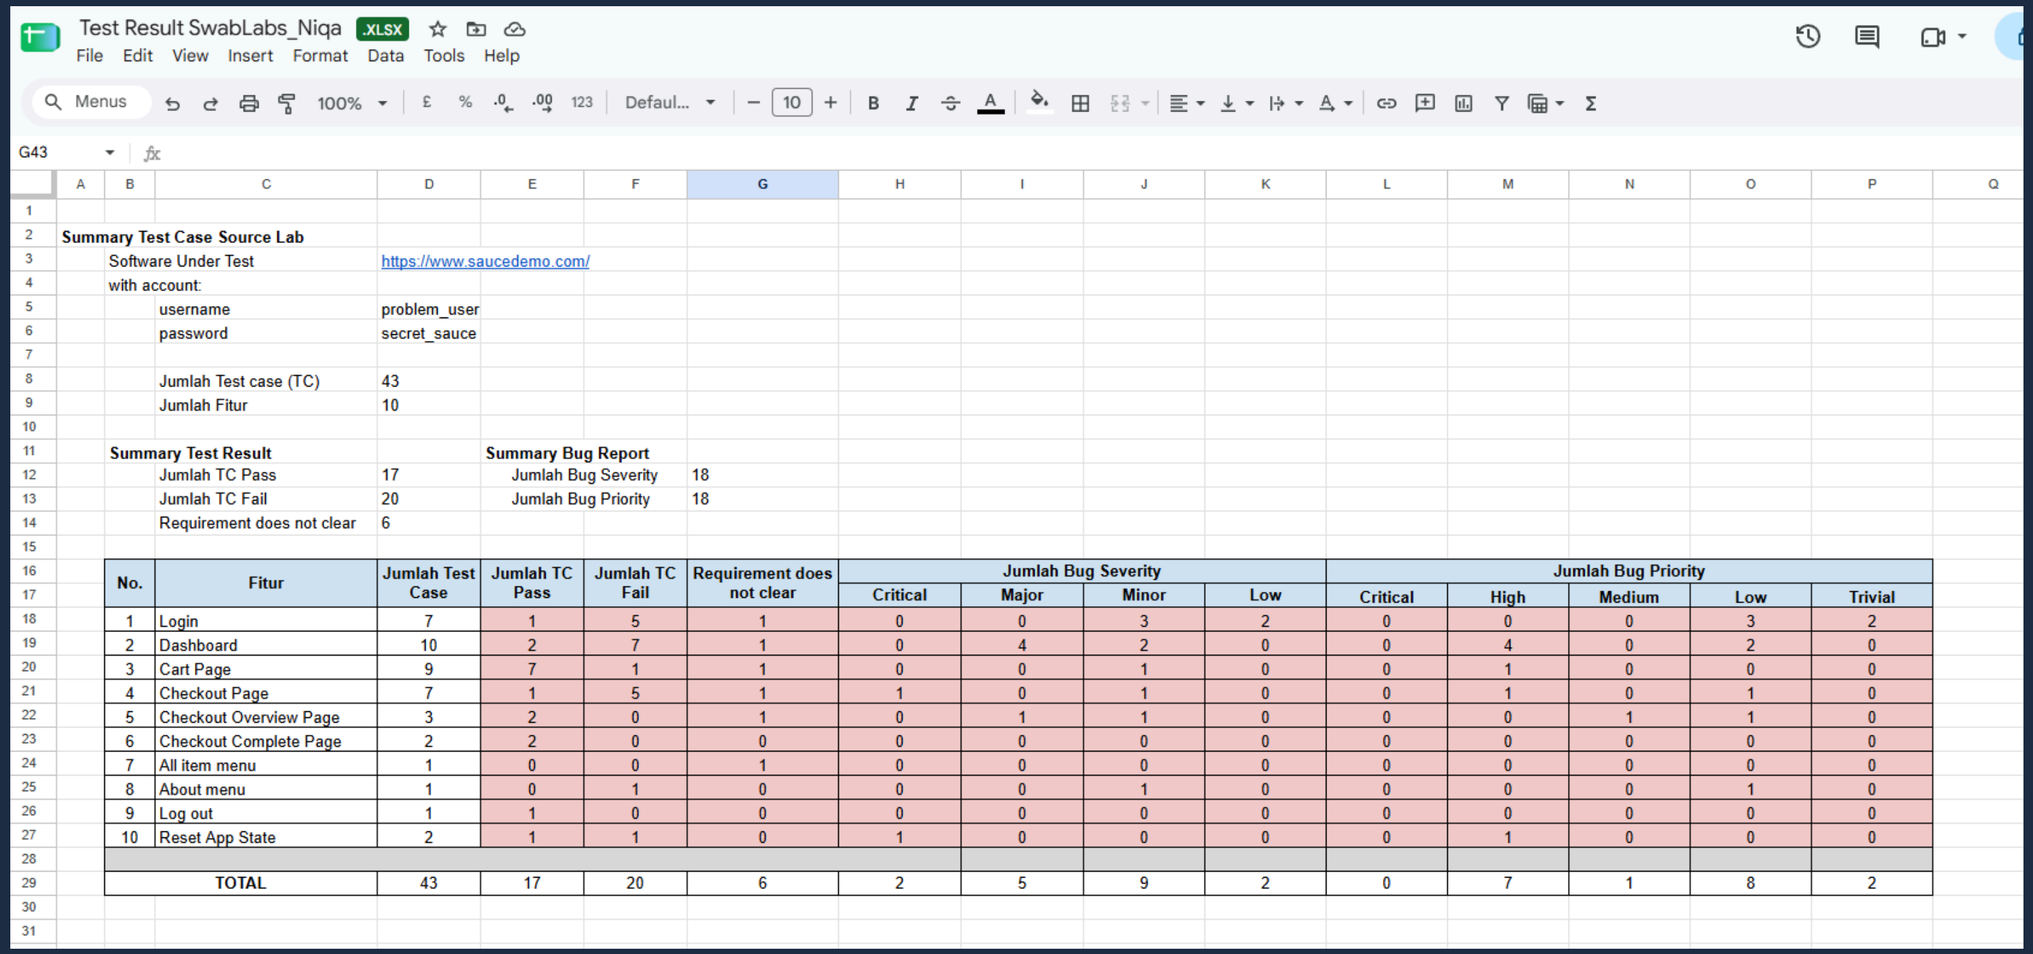

When requirements and expected results are inconsistent, confirm the intended behavior with the System Analyst or Developer.

P.S. Requirement changes are common in Agile/Scrum development. Therefore, when an application feature no longer matches the current requirements or test cases, confirm whether the requirement has changed before reporting it as a defect.

Bug Report

Evidence Id	Nama Fitur	Case Id	Bug Tittle	Bug Severity	Bug Priority	Description on Issue	Attachment Evidence Bug
IR-3.1	Pengelolaan data ruangan oleh admin.	TC-3.1.1	Nama kolom tidak sesuai dengan desain	Low	Low	**Summary**: Nama kolom pada tabel daftar ruangan belum sesuai dengan desain yang telah ditentukan. **Step to Reproduce**: 1. Jalankan aplikasi dan login sebagai Admin. 2. Buka Sidebar, klik tombol 'Ruangan'. **Expected Result**: 1. Aplikasi menampilkan halaman daftar ruangan dengan komponen sebagai berikut: 1) Kategori PencarianKolom input pencarian 2) Tombol tambah ruangan 3) Tabel "Daftar Ruangan" dengan kolom: a. No b. Code Ruangan c. Nama Ruangan d. Status e. Kode Gedung 4) Action (terdapat tombol delete dan edit) **Actual Result**: Aplikasi menampilkan halaman daftar ruangan, namun nama kolom pada tabel tertulis "Code Ruangan" bukan "Kode Ruangan" sesuai desain yang diharapkan.	
IR-3.2	Pengelolaan data ruangan oleh admin.	TC-3.5.1	Tidak ada tombol filter berdasarkan hari dan minggu	Minor	Low	**Summary**: Tombol filter berdasarkan hari dan minggu tidak tersedia pada halaman kalender, sehingga tidak sesuai dengan spesifikasi desain. **Step to Reproduce**: 1. Jalankan aplikasi dan login sebagai Admin. 2. Buka halaman Kalender. **Expected Result**: 1. Aplikasi menampilkan halaman kalender sesuai dengan desain, dengan komponen: a. Tombol pilih tanggal b. Tombol 'Left Arrow' c. Tombol 'Right Arrow' d. Tombol Download PDF e. Tombol Download Excel 2. Tabel kalender dengan kolom: a. Ruangan b. Waktu Operasional (06.00–18.00) dalam bentuk kolom dengan jarak antar kolom 1 jam	

Bug Severity	
	Critical: Menyebabkan sistem gagal total. Major: Merusak bagian besar sistem. Minor: Ada perilaku tak sesuai, tapi sistem tetap berjalan. Low: Tidak berdampak pada sistem.

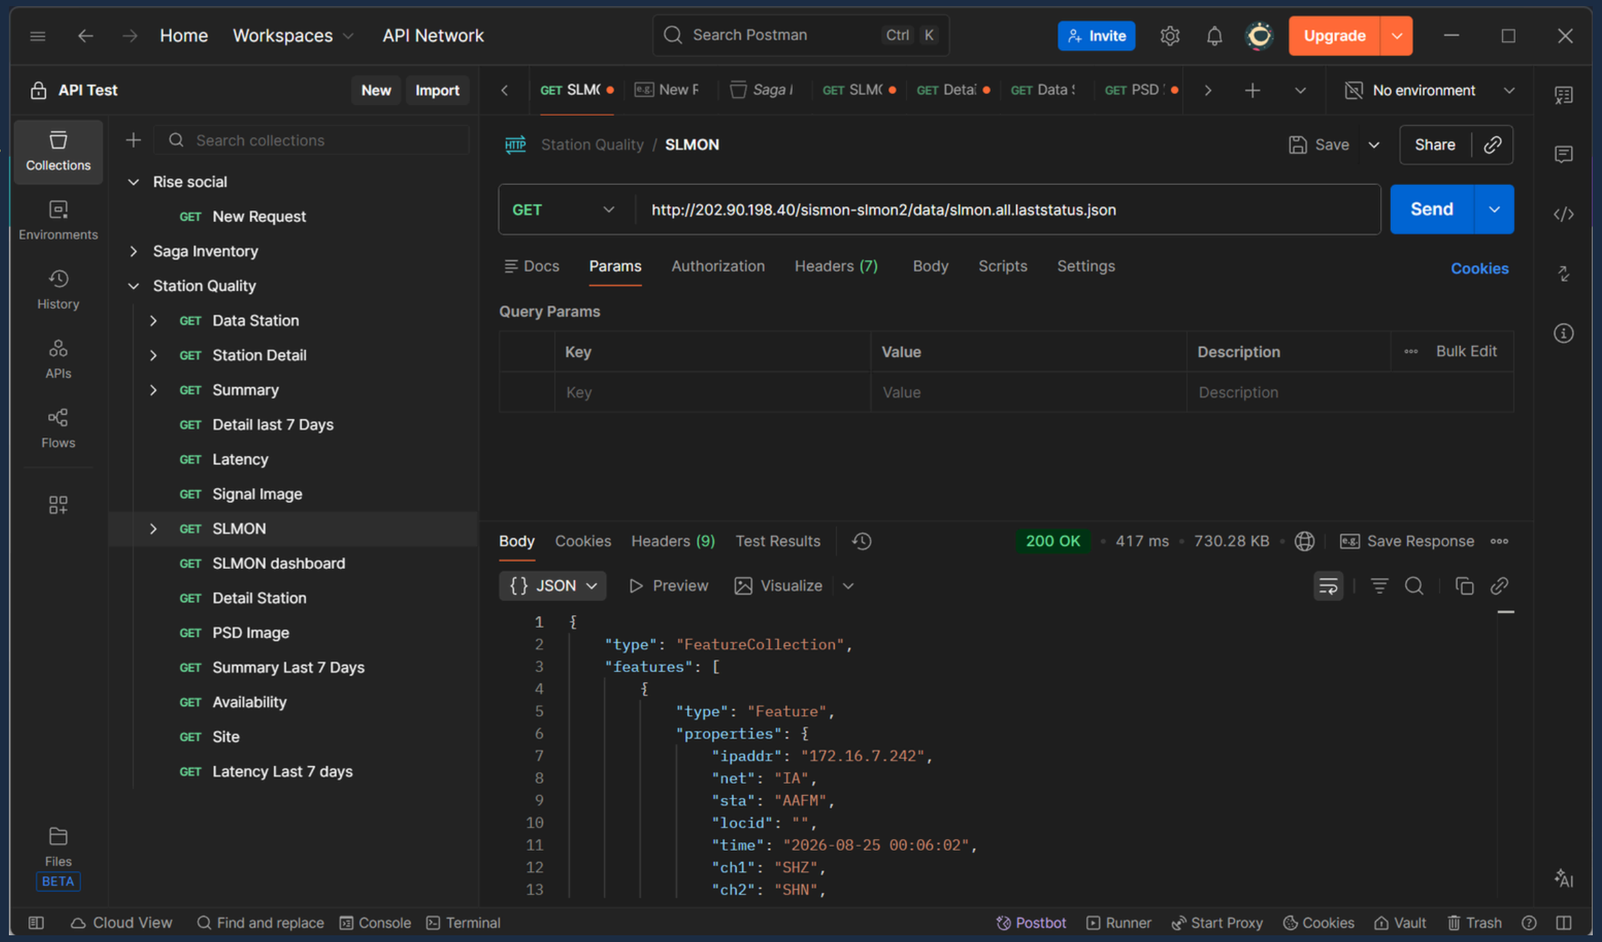

Bug Priority	
	Critical: Harus segera diperbaiki, menghambat sistem. High: Berdampak besar, perlu cepat diperbaiki. Medium: Berpengaruh, tapi tidak mendesak. Low: Dampak kecil, bisa ditunda. Trivial: Masalah minor, perbaikan opsional.

API Testing

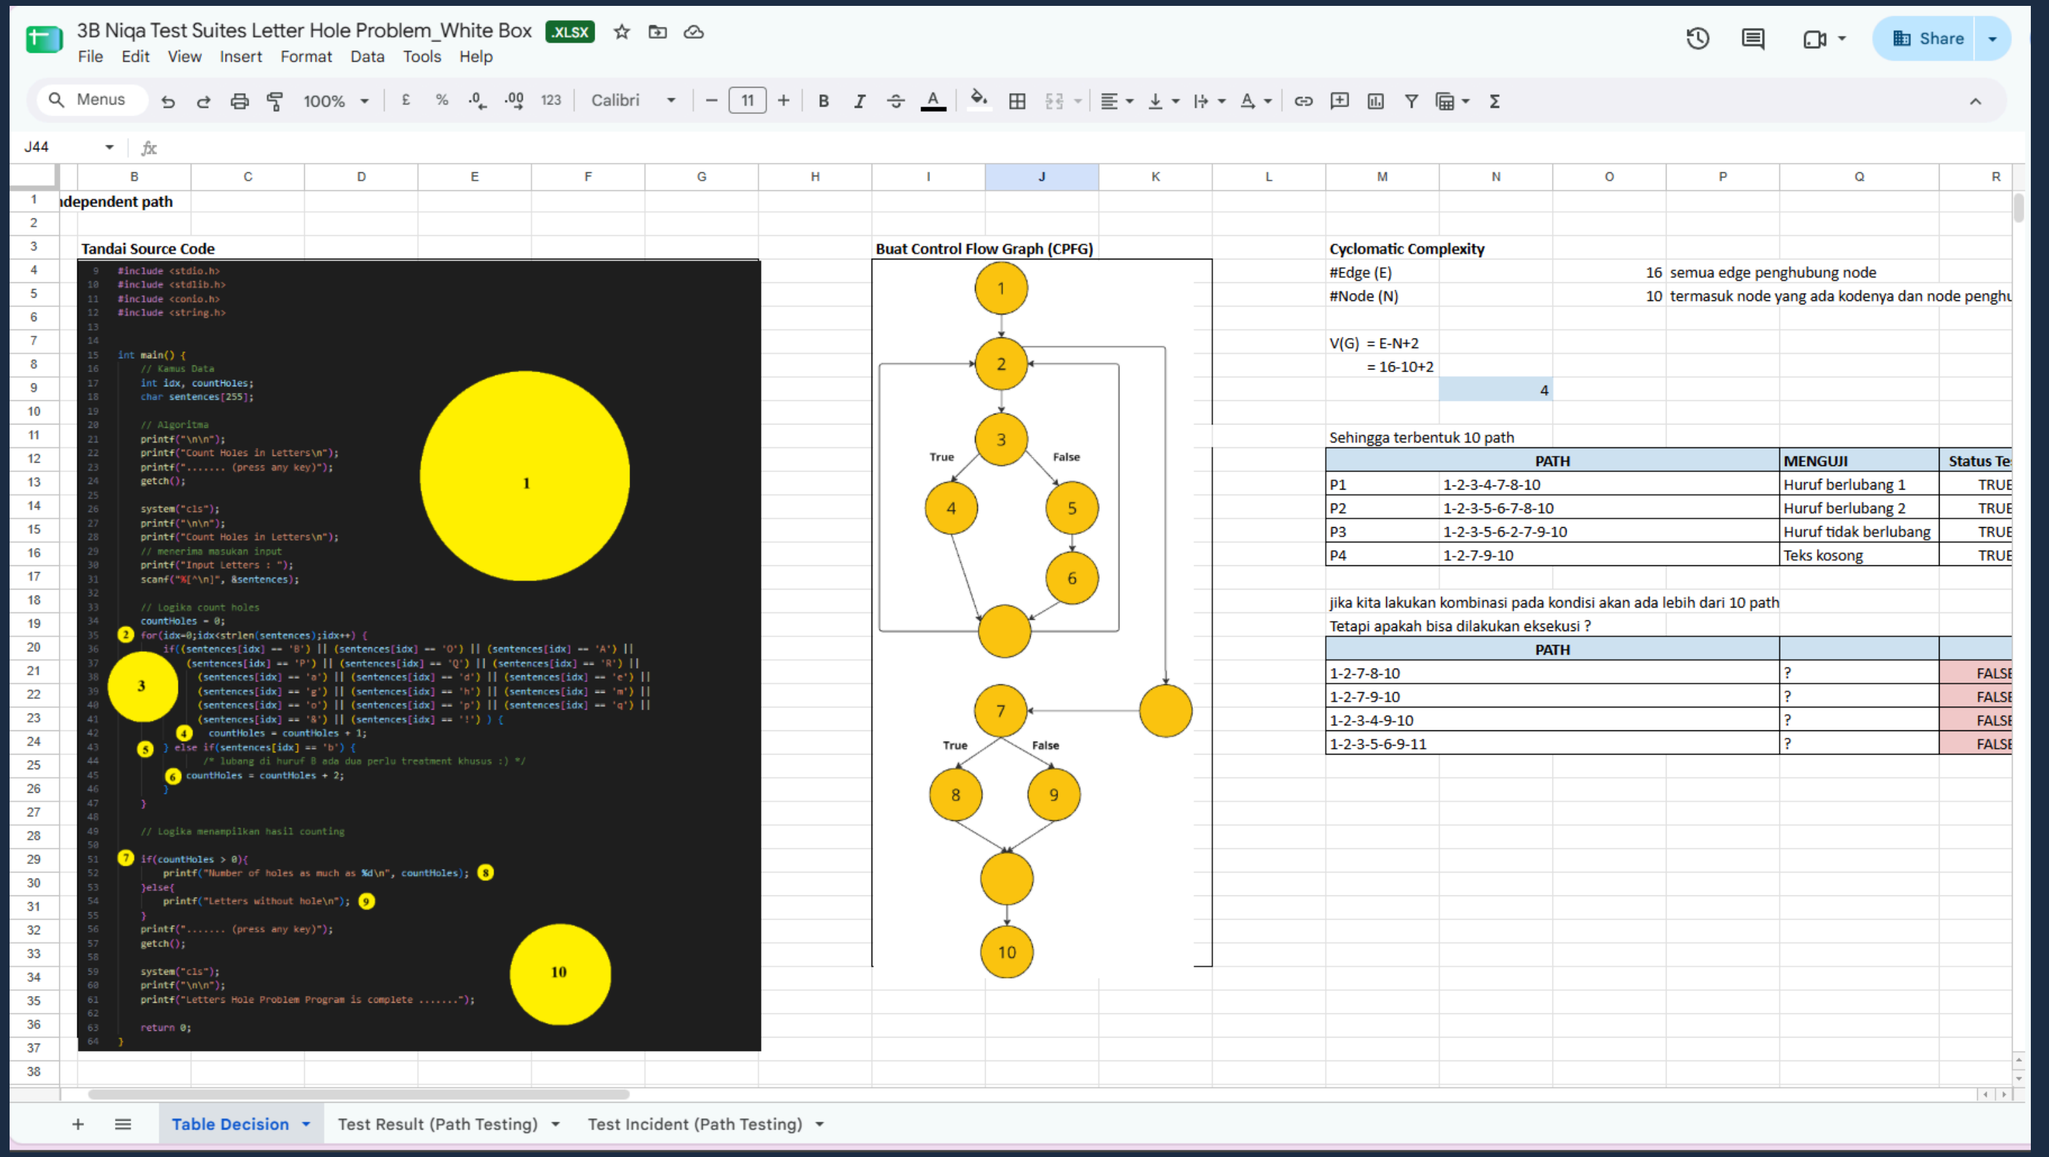

Each Collection is for different project and set up

Each feature may require different API requests and configurations, including authorization, request parameters, headers, and request bodies. **Clearly define and name each request according to its purpose to ensure consistency and ease of identification.**

White Box Testing

Ensure path coverage by testing all possible feature paths and loops.

[More](#)

Behavior-Driven Development (Cucumber)

Uses plain text in a structure called Gherkin (with words like Given, When, and Then) so anyone can read the requirements.
