NIQA NABILA NUR IHSANI

Bandung, Indonesia | +62 852-2175-2429 | niqanabila06@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Engineering & Informatics graduate with hands-on experience in software quality assurance, manual and automated testing, and Agile development. Holds a Junior Software Quality Assurance certification from ArutalaLab, with experience in test case design (ECP/BVA), API testing (Postman), BDD (Cucumber), Selenium, UAT, Requirement Traceability Matrix (RTM), and defect reporting. Executed 94 test cases and documented 43 bugs across a project involving 6 development teams, while supporting software development and API testing at BMKG. Skilled at translating business requirements and acceptance criteria into testable scenarios.

TECHNICAL SKILLS

Testing: Black-Box Testing (ECP, BVA), Test Case Design, Functional Testing, Boundary Testing, Negative Testing, API Testing (Postman), BDD (Cucumber), Selenium, UAT, RTM, Defect Reporting, JUnit/Pytest
Programming: Python, Java, JavaScript/TypeScript, PHP, SQL
Development & Databases: React.js, Next.js, Node.js, Django, Spring Boot, MySQL, MongoDB, Redis, Talend (ETL)
Engineering & Tools: REST APIs, Agile/Scrum, Kanban, Jira, Git/GitHub, Docker, Taiga, Draw.io, dbdiagram.io, Excel
Languages: Indonesian (Native); English (TOEIC 870)

PROJECT EXPERIENCE

SIPTA - Thesis Management Platform | Software Quality Assurance *Feb - Jun 2025*

- **Agile Collaboration:** Collaborated with 6 development teams in Agile/Scrum, defining acceptance criteria and participating in sprint reviews; re-tested affected and related features after changes to verify fixes and prevent regressions.
- **Test Design:** Designed and categorized test cases using functional, boundary, and negative testing across sub-features including CRUD, interface, search/filtering, and accessibility.
- **Test Execution:** Executed 94 test cases and documented 43 bugs (2 critical, 24 major, 15 minor, 1 low) in staging.

Zaidan Educare Information System | Software Tester *Mar - Jun 2025*

- **Test Design & Automation:** Designed and executed black-box tests for the Student Payment Status module using ECP/BVA, then automated selected scenarios with Cucumber.
- **Requirements Coverage:** Built a Requirement Traceability Matrix (RTM) mapping requirements to test scenarios and compiled incident reports for deviations.

Swag Labs E-Commerce Web App - QA Certification Project | Software Quality Assurance *Jun 2025*

- **Test Execution:** Designed and executed 43 black-box test cases across 10 features using functional, boundary, and negative testing techniques.
- **Defect Analysis:** Documented 18 bugs (2 critical, 5 major, 9 minor), including a checkout-breaking defect that blocked 4 downstream test cases; flagged 6 ambiguous requirements for clarification.

WORK EXPERIENCE

Mandiri International Remittance | Remote, Kuala Lumpur | *Software Engineer* *Aug – October 2026*

- **Pipeline:** Developed an automated payment reconciliation pipeline using Django to match bank transfers with customer payments, reducing manual reconciliation.
- **Requirements:** Defined business rules, user stories, and technical requirements with Finance, Operations, and IT; translated requirements into testable system behavior and tracked delivery in Jira.

Meteorology, Climatology, and Geophysical Agency (BMKG) | Indonesia, Jakarta

Guest Technical Trainer *Nov 2025*

- Subject Matter Expert who trained 20+ senior staff in web development (HTML/CSS) and Agile methodologies (Scrum/Kanban) through live coding.

Software Engineer Intern *Jun - Oct 2025*

- **Seismic Station System (React/Node.js):** Defined 12 functional features with acceptance criteria, built 13 REST API endpoints tested in Postman, and optimized performance with Redis caching and Docker.
- **E-Learning Revitalization:** Refactored legacy PHP and redesigned database schemas (dbdiagram.io) for INATEX core modules.

Headstarter AI | Remote, New York | Software Engineering International Fellow *Jul - Sep 2024*

- Completed a 7-week fellowship building 5+ full-stack projects, including AI-powered apps, with Next.js, OpenAI, and Firebase.

EDUCATION

Bandung State Polytechnic (Polban) | Applied Bachelor (D4) of Computer Engineering and Informatics *Aug 2022 - 2026*
Relevant Coursework: Software Testing, Software Analysis & Design I-II, Industry Software Engineering Best Practices

ORGANIZATIONAL & LEADERSHIP

Regional Youth Leadership Summit (RYLS) International 2025 | Scholarship Awardee & Delegate | Tokyo, Japan *Nov 2025*

- Awarded a competitive scholarship to represent Indonesia at RYLS 2025 in Tokyo, selected based on leadership potential and an SDG-focused essay.

Assalam Polytechnic Bandung | Deputy Head of Social Management *Mar 2023 - Jan 2025*

- Secured 20+ media partnerships for large-scale public events; managed financial planning for 7+ programs, including National PIF.

CERTIFICATIONS & AWARDS

Junior Software Quality Assurance - ArutalaLab (2026) | Data Science with Microsoft Fabric - Dicoding (2026)
Belajar Dasar Data Science - Dicoding (2026) | Innovating with AI - Yayasan Plan International Indonesia (2025)
2nd Runner-up, National SDGs Essay - Global Youth Action (2026) | Best Research Award - Literary Talent & Research Initiative (2025)
